

WILL AI BEAT US IN THE JOB MARKET? ABSOLUTELY NO WAY!

A PERSUASIVE SPEECH

Run-ze Tian (Max)

Created 1st December 2024

Abstract

Many people worry that AI will beat us in the job market, but **from the perspective of history, the current limitations of AI, and the potential for future job growth**, AI will not dominate the job market but instead **reshape** it, creating opportunities for human creativity and growth.

Table of Contents

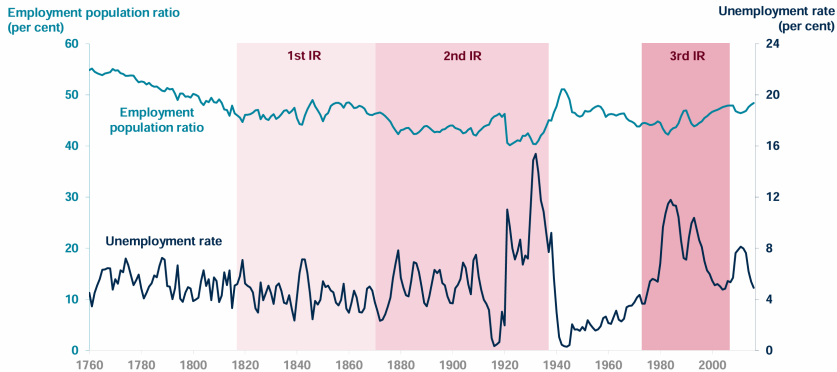

1 Historical Perspective

Employment Rate Remained STABLE

1 Historical Perspective

Little evidence of technological unemployment over long term

Source: Bank of England

Note: The overall employment rate remained stable during the Industrial Revolutions.

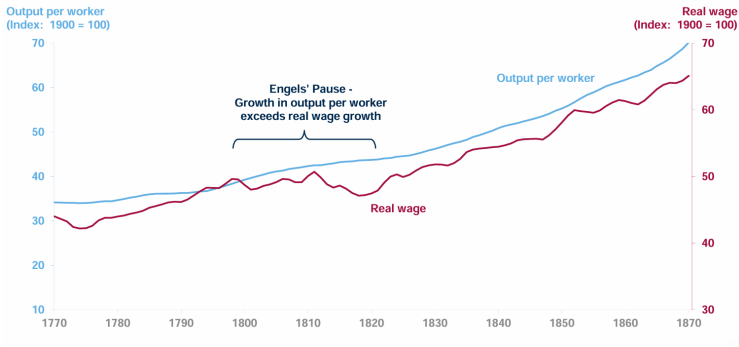

Living Standards Raised

1 Historical Perspective

- Increase productivity
- Increase Real wage

Pickup in real wages lagged productivity during the 1st IR

Source: Bank of England. Note: series are ten year moving averages.

Table of Contents

2 Current Limitations

Shortage of Emotional Intelligence and Stability

2 Current Limitations

AI may excel in certain areas, but its current limitations ensure that it serves as a tool to **assist humans, not replace them.**

- Lack of EI:

- A) AI cannot truly empathize or be emotionally anticipatory
- B) AI cannot make decisions considering human emotions

- Not Always Right

- A) CNET had to issue several corrections after using AI
- B) IAMAW workload increased for implementing new AI tools

3 Future Job Growth

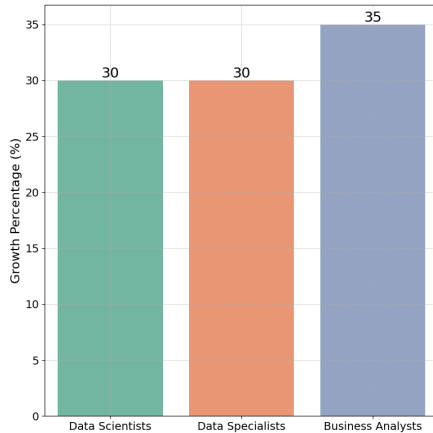

Future Job Growth

3 Future Job Growth

More companies expect jobs growth.

AI-linked roles are expected to swell

Table of Contents

4 The End

Conclusion

4 The End

*AI will not replace us but **reshape how we work**. It is a catalyst for progress, pushing us toward more creative, meaningful, and higher-value work.*

*Let us embrace its potential to enhance our lives
and career!*
